## General Information

- Morning Extended Care hours will be used for group activities, as well as some academic focus. There will be time for reading in the library, and students can work on math and language practice during a designated "Academic Time."
- Computers and tablets are available to the children in the STEM camps.
- Montessori Academy of Cincinnati provides 2% milk at lunch time.
- Paperwork, including Emergency Transportation and Medical Forms, will be sent to you upon receipt of your application. These must be completed and submitted prior to beginning our Summer Camp.
- **Camp Tuition and extended care fees are non-refundable and are payable with your application. However, if enrolling in more than four weeks, a minimum of two weeks' tuition and fees are due with your application and will apply to your last two weeks of camp.**
- **Priority enrollment deadline for 2019-20 MAC students is April 5, 2019.** After April 5, enrollment is on a first-come, first-served basis.

## Elementary STEM Camps

### Wacky World of Aircraft

The adventure begins with a steep climb to cruising altitude as our aspiring pilots learn the fundamentals of unpowered, subsonic, and supersonic flight. Campers earn their wings building their own aircraft ranging from paper airplanes to balsa models.

### Coding & Digital Design

This camp explores how technology has revolutionized video production, website design, 3-D modeling and more. Campers will use software to create their own logos, "photoshop" pictures to produce exciting visual effects, and generate three dimensional virtual representations of their unique product ideas! Balancing design with coding, campers use MIT's Scratch to increase their understanding of logic and programming.

### High Voltage Heroes

Through an understanding of circuit components and the flow of electricity, campers arm themselves with the knowledge to create the super gadgets they need to save the day! From series and parallel circuits to capacitors and electromagnetic motors, the nanoscopic world of fast-moving electrons brings their heroes to life.

### Kids Crime Lab

Kids Crime Lab guides campers through the discovery of clues and the tackling of challenges tied to topics such as cellular structure and DNA. The junior detectives will gather evidence required to analyze the case and learn how to interpret the evidential data and draw conclusions necessary to crack the case!
